

DESCRIPTIVE CATALOGUE OF THE WASHINGTON RELICS IN THE UNITED STATES NATIONAL MUSEUM.

By THEODORE T. BELOTE,

Assistant Curator, Division of History, United States National Museum.

INTRODUCTION.

The collection of objects in the United States National Museum relating to George Washington consists of a variety of material gathered from numerous sources. While composed largely of articles of domestic and artistic interest, which were owned by Washington at Mount Vernon, the collection includes also mementos of his life in the field during the War of the Revolution, and a number of other miscellaneous relics of greater or less importance.

Mount Vernon house,¹ historically the most interesting of American mansions, and closely associated with nearly all the objects herein described, was erected in 1743 for Lawrence Washington, the half-brother of George, and so named in honor of Admiral Edward Vernon, R. N., under whose command Lawrence Washington had served during the British expedition against Cartagena in 1741. The property² passed into the hands of George after the death of Lawrence in 1752, and the house was later improved and enlarged. When Mrs. Washington died in 1802 Mount Vernon became, in accordance with Washington's will, the property of his nephew Bushrod Washington, who in turn bequeathed it to his nephew John Augustine

¹ Benson J. Lossing, in his work *Mount Vernon and Its Associations*, Hartford, 1870, has given an interesting popular account of the history of Mount Vernon and of the objects which the mansion contained during the lifetime of Washington. While the historical accuracy of some of Mr. Lossing's statements has been questioned, the work gives much information of value not elsewhere available.

² The original tract of land consisted of five thousand acres above Dogue Run which, in 1674, was granted by Governor Berkeley jointly to John Washington, great-grandfather of George and Lawrence Washington, and to Nicholas Spence, of Bedford, England. John Washington's half lay between Dogue Run and Little Hunting Creek. By his will, dated September 11, 1675, he bequeathed this Hunting Creek property to his son Lawrence Washington, grandfather of George, who in turn bequeathed it in 1697, to his daughter Mildred, from whom it was inherited in 1730 by Augustine Washington, father of George. In 1740 Augustine Washington conveyed the tract to his son Lawrence, and in 1743 confirmed the gift by will, providing, however, that should Lawrence die without issue the property should go to Lawrence's half-brother George. Lawrence died in 1752, leaving a widow and daughter. The daughter dying soon after, the estate passed to George Washington, but the widow of Lawrence retained a life interest in it, which interest she released to George Washington in 1754 in consideration of fifteen thousand pounds of tobacco to be given her annually during her natural life. She died in 1761. See *George Washington and Mount Vernon*, by Moncure Daniel Conway. *Memoirs of the Long Island Historical Society*, vol. 4, Brooklyn, N. Y., 1889.

Washington, from whom it passed to a son of the same name, and in 1858 was purchased from him by the Mount Vernon Ladies' Association.¹

By an act of Congress approved June 20, 1878,² the Government purchased a collection of Washington relics from G. W. Lewis and others, the heirs of Mrs. Lawrence Lewis,³ the adopted daughter of Washington and the wife of his nephew Major Lawrence Lewis. After the death of Mrs. Washington in 1802 these objects had passed into the hands of Mrs. Lewis, and on her death in 1852 were received by her heirs, who held them until their purchase by the Government in 1878, when they were deposited in the United States Patent Office, where they remained until transferred to the United States National Museum in 1883.

The objects purchased from the Lewis heirs form the greater portion of the Washingtoniana in the Museum, and are designated as belonging to the "Lewis collection" in the present catalogue. The sources of other Washington relics, received by the Museum at various times as loans or gifts, are given in connection with the description of the articles.

In the Museum collection of Washingtoniana, manuscripts are lacking. The science of history, however, is not confined to manuscripts alone for the sources of its data, and the collection as it stands is of great interest and value, both to the student of history and to the general public.

In the preparation of this catalogue a number of works on antiques have been consulted and references to these are given in footnotes. Besides the printed authorities referred to in the footnotes, the information herein given has been derived from labels accompanying the objects while in the Patent Office,⁴ and from the correspondence of the Museum authorities with the Patent Office authorities and with individuals who have had more or less personal knowledge of the various objects in the collection. Information concerning the collection, not otherwise attributed in the footnotes, has been derived from these manuscript sources now in the Museum files.

Acknowledgment should be made of the important assistance rendered in the preparation of this catalogue by Mr. A. Howard Clark, curator of the Division of History of the United States National Museum, under whose supervision the Washington collection was removed from the Patent Office to its present location in 1883.

APPENDIX 1.

Extract from a letter from Ellis Spear, U. S. Commissioner of Patents, May 6, 1878, to the Honorable Carl Schurz, Secretary of the Interior, concerning the Lewis collection of Washington relics:

"In compliance with your order, I have carefully examined these relics and submit the following report:

"The relics consist of a large number of articles chiefly of personal and household use.

"The following inventory was made by the family and has been carefully verified by me.

"One large mirror; two small mirrors.

"One dozen handsome parlor chairs.

"Two armchairs.

"One large easy chair in which the general sat a few minutes before his death.

"One double brass candlestick by which the farewell address was written.

"Two silver-plated candlesticks.

"One large and two small plated waiters.

"One field glass used in the Revolution.

"One spyglass also used in the war.

"Knives and forks.

"One plated cake basket.

"One large mahogany box in which silver plate was kept.

"Two mahogany footstools and three carpet-covered footstools.

"The robe in which he was christened.

"Three silver-plated lamps.

"Half dozen silver-plated salt cellars.

"Thirty-six pieces of chinaware.

"One bedstead presented to Mr. Lawrence Washington by his friend, Admiral Vernon, and by Lawrence left to his brother, the general.

"One marble-top table 4 feet in length by 3 feet in breadth.

"One guitar presented by General and Mrs. Washington to Miss Nellie Custis.

"Miniature portraits of General and Mrs. Washington on wood, painted by Trumbull.

"One shaving glass in frame with drawer.

"An engraving of the Countess of Huntingdon presented by her to General Washington.

"Several souvenirs of Washington, consisting of ornamental works and household articles.

"All of these relics have been continuously in the possession of the Lewis family since the death of General Washington. They were received by Mrs. Lewis, who was the adopted daughter of General Washington and the wife of Major Lawrence Lewis, his nephew, and were in her possession until her death in 1852, when they passed into the hands of the family now having them in charge. They are all in an excellent state of preservation, and of the genuineness of every article there can be no doubt whatever.

"The miniature portraits were considered excellent likenesses and are now in good condition.

"The articles of household use are all in their original condition and illustrate the style of living of the first President of the United States. The whole collection is far superior to that now in the possession of the Government.

"The total number of articles enumerated is more than ninety, and, added to those now in the possession of the Government, they would form, I think, by far the largest and best collection of relics of Washington that could now be made.

"The family were reluctant to part with these relics, but were impelled by the consideration that inevitably in a few years with the separation of the family the

articles would be scattered, and perhaps a large number of them in the course of time lost or destroyed. They felt also that every citizen of the country who shared with them an interest in Washington would be glad to have these relics made public property and placed where they would be accessible to all.

"The small collection now in the possession of the Government is visited by thousands of people every year.

"The addition thereto of the articles now offered would constitute a most complete and interesting collection and would insure the preservation of these valuable relics."
